RECEIVED  
BUREAU OF LAND MANAGEMENT  
DEPT. OF INTERIOR

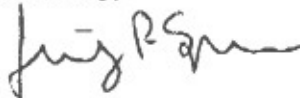

Dear Mr. Terland,

I would like to protest the offer by the BLM of parcel # 298 in the November 21, 2006 Oil and Gas Lease sale. I own property on which I spend the majority of my time, one half mile from the Dewey Bridge. I feel that any drilling on this parcel will impact my view and impact the noise level. Drilling on parcel # 298 would cause increased traffic on a road that is visible and audible from my property. Having trucks going up and down that road would impact the solitude of bikers and other recreational users of this road that leads to the Top Of the World as well. There is already a drill on Dome Plateau on a piece of SITLA land. I can see the top of this rig during the day, the lights during the night and can hear it anytime of the day when the wind and temperature conditions are right.

This fall there have been excessive rains that have caused significant erosion along route 128 and into the Colorado River just below parcel #298. My worry would be that industrial waste products could possibly be washed into the river and cause unnecessary damage.

Thank you for your consideration in this matter,

Sincerely,

Jennifer P. Speers
